

Client Meeting #2 - October 26, 2016

- About Me page - should include contact info such as email
- Dynamic Grid - objects can move if hovered over. Make sure grid has more space between images, less congested
- Each project can have its own page
- Social media links - include in navigation bar / side bar. Each social media button can be in different color from color palette. Include Vimeo, Instagram and Tumblr, even if accounts aren't set up yet.
- Color palette: good to go
- Typeface is also good, no changes needed. Can still explore some other options though
- Head logo is good, but needs to be adjusted. Gabby will send over some sketches, needs to be converted into vector logo.
- Keep "Gabby" as site name. Might be too simple/ not specific enough for portfolio site?
- About Me page - Gabby head with pixel speech bubble
- Send Gabby some artists bio samples
- Might have to upload video files onto Vimeo in order to embed them on website
- Make mock-up of website with actual colors and logo, etc.
